Question 50
D The Scrum Team.

Question 51
A The Product Owner.

Question 52
A Never, as the entire Scrum Team is responsible for creating value every Sprint.

Question 53
A It is dynamic and can evolve as more information is learned about the product and its customers.

Question 54
C The Sprint Backlog.

Question 55
B When they are actively working on items in the Sprint Backlog, in which case they participate as a Developer.

Question 56
B The Developers.

Question 57
A The team would have fewer opportunities to inspect and adapt the Sprint Backlog.
D The Sprint Backlog may become outdated.
E Impediments would be identified and resolved more slowly.

Question 58
C Estimates should be made by those doing the work.

Question 59
D When it meets the Definition of Done.

Question 60
D True, their participation and availability impact the team's outcomes.

Question 61
D Explain to the IT manager that progress in Scrum is demonstrated by inspecting an Increment at the Sprint Review.

Question 62
C The product Increment.

Question 63
A Engaging with stakeholders.
E Ensuring that the most valuable functionality is delivered first.

Question 64
B By facilitating decision-making within the Scrum Team.
D By removing impediments that hinder the Scrum Team's progress.

Question 65
B Maximizing the value of the work done by the Scrum Team.

Question 66
B FALSE

Question 67
C Let the Developers self-manage and decide what to do.

Question 68
B A single Scrum Master.
C A group of Developers.
E A single Product Owner.

Question 69
D All of the above.

Question 70
B After the Sprint Retrospective has been completed.

Question 71
C The item should not be included in the Increment for that Sprint.
D The item should be placed back on the Product Backlog for the Product Owner to decide what to do with it.

Question 72
D Enough to meet the Definition of Done.

Question 73
A Tell the Product Owner so they can discuss it with the CEO.

Question 74
B Right after the previous Sprint ends.

Question 75
B To review the product Increment with stakeholders and gather feedback for future work.

Question 76
C Whoever the Developers choose to start.

Question 77
B Create Product Backlog items for each performance concern.
C Include performance concerns in the Definition of Done.

Question 78
C The Developers on the Scrum Team should write the user documentation themselves.

Question 79
A The Sprint Retrospective.

Question 80
A Inform the Product Owner so that the matter can be worked with the CEO

Question 81
D Product Goal
E Sprint Goal
F Definition of Done

Question 82
D Explain the Product Backlog items

Question 83
A Scrum is a lightweight framework that helps people, teams, and organizations generate value through adaptive solutions for complex problems.

Question 84
D The most impactful improvements are addressed as soon as possible. They may even be added to the Sprint Backlog for the next Sprint.

Question 85
A Helping employees and stakeholders understand and enact an empirical approach for complex work.

Question 86
A The Developers
B The Scrum Master
C The Product Owner
D Invited people

Question 87
C hey are treated as regular Product Backlog items and addressed in early Sprints. However, independent of the situation, every Sprint must have at least some business functionality, no matter how small.
D Throughout the product development.

Question 88
A It is continuously refined.
B As long as a product exists, its Product Backlog also exists.
D It is emergent.

Question 89
D As soon as possible to minimize further deviation.

Question 90
B FALSE

Question 91
B The team's collaboration
D Identify the most helpful changes to improve its effectiveness

Question 92
C Maximum 4 hours in a one-month Sprint, and usually shorter for shorter Sprints.

Question 93
E The Product Owner

Question 94
A How much work remains till the end of the Sprint

Question 95
C Ensuring that the Product Backlog is transparent, visible, and understood
D Ordering Product Backlog items
E Developing and explicitly communicating the Product Goal

Question 96
A All incomplete Product Backlog Items are re-estimated and put back on the Product Backlog
B If part of the work is potentially releasable, the Product Owner typically accepts it
D Any completed and "Done" Product Backlog items are reviewed

Question 97
C How much is known about the Product over time.

Question 98
B Coach the Scrum Team on defining a Definition of Done that is achievable given current circumstances
D Facilitate the process of having the Scrum Team improve its skills, tools, and environment over time and adjust the Definition of Done (Correto) as needed

Question 99
B The Product Owner.
E The Developers, but the Product Owner remains accountable.

Question 100
A TRUE

Question 101
A The Scrum Master

Question 102
A Ask the Product Owner to explain the product, its business need, history, goals, and context.
B Ask the Developers to introduce themselves to each other and tell about their skills and background.
D Ask the Developers to discuss and identify the way they are going to develop the product.

Question 103
C Sprint Backlog.
D Product Backlog.
E Increment

Question 104
B FALSE

Question 105
D The Product Backlog

Question 106
B FALSE

Question 107
D A revised Product Backlog that defines the probable Product Backlog items for the next Sprint

Question 108
D Complex work that can include all the suggested options and even more

Question 109
A Product Value Maximizer
B Product Marketplace Expert
C Lead Facilitator of Key Stakeholder Involvement
D Product Visionary

Question 110
B It should choose how best to accomplish their work, rather than being directed by others outside the team
D It should have all the skills necessary to create value each Sprint

Question 111
B FALSE

Question 112
D Sprint scope is defined at the Sprint Planning and cannot be changed
E The Sprint Goal is changed frequently to reflect the status of the remaining work

Question 113
C A small team of people.

Question 114
B Facilitating stakeholder collaboration as requested or needed
C Helping find techniques for effective Product Backlog management
D Helping the Scrum Team understand the need for clear and concise Product Backlog items

Question 115
E The Scrum Team

Question 116
D The Scrum Team.

Question 117
C Lean Thinking
E Empiricism

Question 118
B FALSE

Question 119
C Respect
E Openness
F Courage
G Commitment
H Focus

Question 120
A It is an opportunity for the Scrum Team to plan ways to increase quality and effectiveness.

Question 121
C It is up to the Scrum Team.

Question 122
B FALSE

Question 123
C Smaller than those on the Product Backlog

Question 124
B By facilitating Scrum decisions
C By causing the removal of impediments to the Scrum Team's progress

Question 125
A Events
B Artifacts
C Accountabilities
D Rules

Question 126
B FALSE

Question 127
B It has just enough detail.

Question 128
D The Sprint Review

Question 129
B Bring all the candidate members together and let them organize into Scrum Teams
C Existing teams propose the new Scrum Teams

Question 130
D The Product Owner

Question 131
A The Scrum Team

Question 132
A Key Stakeholders.
B The Scrum Master.
C The Product Owner.
D The Developers.

Question 133
C The Scrum Team prioritizes the list and works on them in order

Question 134
C Both the ability of the Scrum Team to create Increments and information on real progress

Question 135
D Product Owner

Question 136
B FALSE

Question 137
C Inspect the outcome of the Sprint and determine future adaptations.

Question 138
C The Developers

Question 139
A Quality is a priority and must not decrease
B No changes are made that would endanger the Sprint Goal
D The Developers can renegotiate the scope with the Product Owner

Question 140
A TRUE

Question 141
A A set of criteria agreed upon by the Scrum Team to determine when work is complete and meets quality standards

Question 142
B It should be small enough to be completed within one Sprint.

Question 143
C It should be complete enough to provide work for the Developers during the initial days of the Sprint.

Question 144
B The Product Backlog evolves to incorporate the changes.

Question 145
C The product burn-down chart illustrates the Sprints on the x-axis, whereas the Sprint burn-down chart represents the days of the Sprint on the x-axis.

Question 146
C Collaborate closely with the Product Owner to gain a clear understanding of what needs to be accomplished.

Question 147
B As quickly as possible after the problem is identified.

Question 148
B FALSE

Question 149
B FALSE

Question 150
A Accountability belongs to the Scrum Team as a whole
B Cross-functional
C Scrum recognizes no sub-teams or hierarchies, within a Scrum Team

Question 151
B Frequently, but it should not get in the way of the work

Question 152
D The Product Owner

Question 153
A If there are multiple Scrum Teams working on the same product, they should share the same Product Goal.
B The Scrum Team must only pursue one Product Goal at a time.
D An Increment is a concrete stepping stone toward the Product Goal.
E During the Sprint Review, progress toward the Product Goal is discussed.

Question 154
D The Sprint Goal, the set of Product Backlog items selected for the Sprint, plus an actionable plan for delivering the product Increment.

Question 155
A TRUE

Question 156
B The standards of the Organization
C Definition of Done of other Scrum Teams working on the same Product

Question 157
D When it meets the Definition of Done.

Question 158
C Short enough to keep the business risks acceptable
D At most, one month

Question 159
A The Scrum Master ensures that the Developers has the meeting
D The Scrum Master teaches the Developers to keep the Daily Scrum within the 15-minute time-box

Question 160
C Self-organization
E Agility
F Teamwork
G Cross-functionality

Question 161
B No, this is not a rule and it is up to the Developers to plan the work necessary to create an Increment that meets the Definition of Done.

Question 162
A Additive to all prior Increments and thoroughly verified, ensuring that all Increments work together.

Question 163
B FALSE

Question 164
C The Developers

Question 165
B FALSE

Question 166
B Coach the Product Owner on how to address the Developers about this issue
C Encourage the Product Owner to add Product Backlog items focusing on the given quality concerts and express the stakeholder's concern to the Developers

Question 167
C The ability of the Scrum Teams to produce Increments
D The benefits of having the Developers figure out a solution for themselves

Question 168
B They must not be included as part of the Increment
C They should be placed on the Product Backlog

Question 169
C They are mandatory.

Question 170
F For the Product Goal to be fulfilled, the entire Product Backlog must be Done.

Question 171
A Develop products and enhancements.
B Release products and enhancements, as frequently as many times per day.
C Develop and sustain Cloud (online, secure, on-demand) and other operational environments for product use
