D Relationships between the team members.
E The Sprint length.

Question 10
A Facilitate opportunities for inspection and adaptation as needed or requested.
B Guide team members in self-management.

Question 11
D They do not need to attend; their only responsibility is to ensure that the Developers hold the Daily Scrums.

Question 12
A Assist the Developers in determining how many Product Backlog items to include in the Sprint.
C Ensure that the Increment is of high quality and meets the stakeholders' expectations.
E Establish a shared understanding of when a Product Backlog item is complete.

Question 13
C All Sprints must last no longer than one month.

Question 14
B Focus.

Question 15
A Gather all individuals and allow them to organize themselves into Scrum Teams.
B Existing teams suggest how they would like to organize themselves within the new structure.

Question 16
D A period for the Scrum Team and stakeholders to review the results of a Sprint and decide on the next steps.

Question 17
B Never. All Developers on the Scrum Team are jointly accountable for items in the Sprint Backlog.

Question 18
A Sprint Planning.
B Daily Scrum.
C Sprint Retrospective.

Question 19
B Forecast the Product Backlog items that align with the Sprint Goal, create the Sprint Backlog, conclude Sprint Planning, and begin development work. Continue to analyze and create additional functionality during the Sprint.
D During the next Sprint Retrospective, discuss why this issue occurred and what changes can be made to prevent it from happening again.

Question 20
D The Scrum Team.

Question 21
A The Product Owner.

Question 22
A Never, as the entire Scrum Team is responsible for creating value every Sprint.

Question 23
A It is dynamic and can evolve as more information is learned about the product and its customers.

Question 24
C The Sprint Backlog.

Question 25
B When they are actively working on items in the Sprint Backlog, in which case they participate as a Developer.

Question 26
B The Developers.

Question 27
A The team would have fewer opportunities to inspect and adapt the Sprint Backlog.
D The Sprint Backlog may become outdated.
E Impediments would be identified and resolved more slowly.

Question 28
C Estimates should be made by those doing the work.

Question 29
D When it meets the Definition of Done.

Question 30
D True, their participation and availability impact the team's outcomes.

Question 31
D Explain to the IT manager that progress in Scrum is demonstrated by inspecting an Increment at the Sprint Review.

Question 32
C The product Increment.

Question 33
A Engaging with stakeholders.
E Ensuring that the most valuable functionality is delivered first.

Question 34
B By facilitating decision-making within the Scrum Team.
D By removing impediments that hinder the Scrum Team's progress.

Question 35
B Maximizing the value of the work done by the Scrum Team.

Question 36
B FALSE

Question 37
A Collaborating with stakeholders to gather requirements and feedback.
C Ordering the Product Backlog based on value and business objectives.

Question 38
D The Developers.

Question 39
B They are addressed alongside the functional development of the product.
C They are added to the Product Backlog and addressed in early Sprints, always including some business functionality, even if minimal.

Question 40
B FALSE

Question 41
C The ability to deliver an Increment each Sprint.

Question 42
B Whenever it is identified by the Developers.

Question 43
C One calendar month.

Question 44
C There should be only one Product Backlog for the product.
E There should be only one Product Owner for the product.

Question 45
C The Developers.

Question 46
C To ensure that the event is focused and efficient.

Question 47
B 4 hours.

Question 48
C By adding them to the Definition of Done.
D By adding them to the Product Backlog.

Question 49
A TRUE

Question 50
D Teaching the Developers to keep the Daily Scrum within 15 minutes.

Question 51
C Stakeholders and the Scrum Team.

Question 52
D Encourage the Developer to discuss their concerns with the team as soon as possible.

Question 53
C Observe their communication and facilitate direct collaboration.

Question 54
D During Sprint Planning.

Question 55
D The Scrum Team.

Question 56
C By value, with items of higher value at the top.

Question 57
C Encourage the entire Scrum Team to participate in the decision-making process.
D Utilize coaching techniques such as asking open-ended questions and actively listening.

Question 58
C Remaining work over time.

Question 59
A The Developers

Question 60
B Its time and location are consistent
D Its purpose is to review progress toward the Sprint Goal and adjust the Sprint Backlog

Question 61
B The Scrum Team has all the necessary skills to deliver value each Sprint.

Question 62
A It concludes the Sprint.

Question 63
B The Sprint Goal.

Question 64
B The individuals should self-manage into teams based on their understanding of the product, vision, and Scrum framework.

Question 65
B Completing all work required to meet the Definition of Done.

Question 66
A The Scrum Team decides what work to do during a Sprint.
C Titles are removed for members of the Scrum Team.
D Scrum is a lightweight framework that allows for self-management.

Question 67
B FALSE

Question 68
B It has just enough detail.

Question 69
D The Sprint Review

Question 70
B Bring all the candidate members together and let them organize into Scrum Teams
C Existing teams propose the new Scrum Teams

Question 71
D The Product Owner

Question 72
A They are capable of transforming Product Backlog items into a valuable and usable Increment.

Question 73
C Let the Developers self-manage and decide what to do.

Question 74
B A single Scrum Master.
C A group of Developers.
E A single Product Owner.

Question 75
D All of the above.

Question 76
B After the Sprint Retrospective has been completed.

Question 77
C The item should not be included in the Increment for that Sprint.
D The item should be placed back on the Product Backlog for the Product Owner to decide what to do with it.

Question 78
D Enough to meet the Definition of Done.

Question 79
A Tell the Product Owner so they can discuss it with the CEO.

Question 80
B Right after the previous Sprint ends.

Question 81
B To review the product Increment with stakeholders and gather feedback for future work.

Question 82
C Whoever the Developers choose to start.

Question 83
B Create Product Backlog items for each performance concern.
C Include performance concerns in the Definition of Done.

Question 84
C The Developers on the Scrum Team should write the user documentation themselves.

Question 85
A The Sprint Retrospective.

Question 86
A Inform the Product Owner so that the matter can be worked with the CEO

Question 87
D Product Goal
E Sprint Goal
F Definition of Done

Question 88
D Explain the Product Backlog items

Question 89
A Scrum is a lightweight framework that helps people, teams, and organizations generate value through adaptive solutions for complex problems.

Question 90
D The most impactful improvements are addressed as soon as possible. They may even be added to the Sprint Backlog for the next Sprint.

Question 91
A Helping employees and stakeholders understand and enact an empirical approach for complex work.

Question 92
A The Developers
B The Scrum Master
C The Product Owner
D Invited people

Question 93
A DoD guides the Developers in knowing how many Product Backlog items it can select during Sprint Planning.
C DoD is used to assess when work is complete.
D DoD ensures artifact transparency.

Question 94
C They are treated as regular Product Backlog items and addressed in early Sprints. However, independent of the situation, every Sprint must have at least some business functionality, no matter how small.
D Throughout the product development.

Question 95
A It is continuously refined.
B As long as a product exists, its Product Backlog also exists.
D It is emergent.

Question 96
D As soon as possible to minimize further deviation.

Question 97
B FALSE

Question 98
B The team's collaboration
D Identify the most helpful changes to improve its effectiveness

Question 99
C Maximum 4 hours in a one-month Sprint, and usually shorter for shorter Sprints.

Question 100
E The Product Owner

Question 101
A How much work remains till the end of the Sprint

Question 102
C Ensuring that the Product Backlog is transparent, visible, and understood
D Ordering Product Backlog items
E Developing and explicitly communicating the Product Goal

Question 103
A All incomplete Product Backlog Items are re-estimated and put back on the Product Backlog
B If part of the work is potentially releasable, the Product Owner typically accepts it
D Any completed and "Done" Product Backlog items are reviewed

Question 104
C How much is known about the Product over time.

Question 105
B Coach the Scrum Team on defining a Definition of Done that is achievable given current circumstances
D Facilitate the process of having the Scrum Team improve its skills, tools, and environment over time and adjust the Definition of Done (Correto) as needed

Question 106
B The Product Owner.
E The Developers, but the Product Owner remains accountable.

Question 107
A TRUE

Question 108
A The Scrum Master

Question 109
A Ask the Product Owner to explain the product, its business needs, history, goals, and context.
B Ask the Developers to introduce themselves to each other and tell about their skills and background.
D Ask the Developers to discuss and identify the way they are going to develop the product.

Question 110
C Sprint Backlog.
D Product Backlog.
E Increment

Question 111
B FALSE

Question 112
D The Product Backlog

Question 113
B FALSE

Question 114
D A revised Product Backlog that defines the probable Product Backlog items for the next Sprint

Question 115
D Complex work that can include all the suggested options and even more

Question 116
A Product Value Maximizer
B Product Marketplace Expert
C Lead Facilitator of Key Stakeholder Involvement
D Product Visionary

Question 117
B It should choose how best to accomplish their work, rather than being directed by others outside the team
D It should have all the skills necessary to create value each Sprint

Question 118
B FALSE

Question 119
D Sprint scope is defined at the Sprint Planning and cannot be changed
E The Sprint Goal is changed frequently to reflect the status of the remaining work

Question 120
C A small team of people.

Question 121
B Facilitating stakeholder collaboration as requested or needed
C Helping find techniques for effective Product Backlog management
D Helping the Scrum Team understand the need for clear and concise Product Backlog items

Question 122
E The Scrum Team

Question 123
D The Scrum Team.

Question 124
C Lean Thinking
E Empiricism

Question 125
B FALSE

Question 126
C Respect
E Openness
F Courage
G Commitment
H Focus

Question 127
A It is an opportunity for the Scrum Team to plan ways to increase quality and effectiveness.

Question 128
C It is up to the Scrum Team.

Question 129
B FALSE

Question 130
C Smaller than those on the Product Backlog

Question 131
B By facilitating Scrum decisions
C By causing the removal of impediments to the Scrum Team's progress

Question 132
A Events
B Artifacts
C Accountabilities
D Rules

Question 133
A The Scrum Team

Question 134
A Key Stakeholders.
B The Scrum Master.
C The Product Owner.
D The Developers.

Question 135
C The Scrum Team prioritizes the list and works on them in order
D The Scrum Master discusses the impediments with the Scrum Team

Question 136
A Accountability belongs to the Scrum Team as a whole
B Cross-functional
C Scrum recognizes no sub-teams or hierarchies, within a Scrum Team

Question 137
B Frequently, but it should not get in the way of the work

Question 138
D The Product Owner

Question 139
A If there are multiple Scrum Teams working on the same product, they should share the same Product Goal.
B The Scrum Team must only pursue one Product Goal at a time.
D An Increment is a concrete stepping stone toward the Product Goal.
E During the Sprint Review, progress toward the Product Goal is discussed.

Question 140
D The Sprint Goal, the set of Product Backlog items selected for the Sprint, plus an actionable plan for delivering the product Increment.

Question 141
A TRUE

Question 142
B The standards of the Organization
C Definition of Done of other Scrum Teams working on the same Product

Question 143
D When it meets the Definition of Done.

Question 144
C Short enough to keep the business risks acceptable
D At most, one month

Question 145
A The Scrum Master ensures that the Developers has the meeting
D The Scrum Master teaches the Developers to keep the Daily Scrum within the 15-minute time-box

Question 146
C Self-organization
E Agility
F Teamwork
G Cross-functionality

Question 147
B No, this is not a rule and it is up to the Developers to plan the work necessary to create an Increment that meets the Definition of Done.

Question 148
A Additive to all prior Increments and thoroughly verified, ensuring that all Increments work together.

Question 149
B FALSE

Question 150
C The Developers

Question 151
B FALSE

Question 152
B Coach the Product Owner on how to address the Developers about this issue
C Encourage the Product Owner to add Product Backlog items focusing on the given quality concerts and express the stakeholder's concern to the Developers

Question 153
C The ability of the Scrum Teams to produce Increments
D The benefits of having the Developers figure out a solution for themselves

Question 154
B They must not be included as part of the Increment
C They should be placed on the Product Backlog

Question 155
C They are mandatory

Question 156
F For the Product Goal to be fulfilled, the entire Product Backlog must be Done.

Question 157
A Develop products and enhancements.
B Release products and enhancements, as frequently as many times per day.
C Develop and sustain Cloud (online, secure, on-demand) and other operational environments for product use
D Research and identify viable markets, technologies, and product capabilities.
E Sustain and renew products.

Question 158
B FALSE

Question 159
C There should be only a single Product Backlog
E There should be only a single Product Owner

Question 160
A Coaching the team members in self-management and cross- functionality
C Helping the Scrum Team focus on creating high-value Increments that meet the Definition of Done
D Causing the removal of impediments to the Scrum Team's progress

Question 161
C Individuals with the skills necessary to accomplish the work

Question 162
C The Scrum Master might facilitate the event
D Stakeholders are invited to attend and provide feedback

Question 163
B 10 or fewer members

Question 164
C Sprint Backlog

Question 165
C Both the ability of the Scrum Team to create Increments and information on real progress

Question 166
D Product Owner

Question 167
B FALSE

Question 168
C Inspect the outcome of the Sprint and determine future adaptations.

Question 169
C The Developers

Question 170
A Quality is a priority and must not decrease
B No changes are made that would endanger the Sprint Goal
D The Developers can renegotiate the scope with the Product Owner

Question 171
A TRUE

Question 172
A A set of criteria agreed upon by the Scrum Team to determine when work is complete and meets quality standards

Question 173
B It should be small enough to be completed within one Sprint.

Question 174
C It should be complete enough to provide work for the Developers during the initial days of the Sprint.

Question 175
B The Product Backlog evolves to incorporate the changes.

Question 176
C The product burn-down chart illustrates the Sprints on the x-axis, whereas the Sprint burn-down chart represents the days of the Sprint on the x-axis.

Question 177
C Collaborate closely with the Product Owner to gain a clear understanding of what needs to be accomplished.

Question 178
B As quickly as possible after the problem is identified.

Question 179
B FALSE

Question 180
B FALSE
